# **UNIT 1—THE SCIENCE OF LIVING THINGS**

### TRUE/FALSE

1.	Agriscience refers to the application of high technology to agriculture.						
	ANS: T	PTS:	1				
2.	Farming and ranching account for more than half of the jobs in agriculture.						
	ANS: F	PTS:	1				
3.	Aquaculture means the study of freshwater, such as lakes and ponds.						
	ANS: F	PTS:	1				
4.	In the United States, the percentage of annual income spent for food has tended to increase.						
	ANS: F	PTS:	1				
5.	Wildlife, trees, and fish are examples of renewable natural resources.						
	ANS: T	PTS:	1				
6.	Biology may be defin	ned as t	he use of cells or co	mp	onents of cells to produce products and processes.		
	ANS: F	PTS:	1				
7.	During the past 50 years	ears, foo	od production has in	cre	ased faster than the world's population.		
	ANS: T	PTS:	1				
8.	Only people who live	e in the	country are surroun	ded	by the world of agriscience.		
	ANS: F	PTS:	1				
9.	Entomology is one of	f the thi	ree basic sciences.				
	ANS: F	PTS:	1				
10.	Production agriculture refers to non-farm and non-ranch jobs.						
	ANS: F	PTS:	1				
MULTIPLE CHOICE							
1.	What percentage of p a. Nearly 5 b. Less than 2	eople i		c.	farmers? Slightly more than 10 Roughly 12		
	ANS: B	PTS:	1				

ANS: D PTS: 1  3. By the year 2025, the world population is projected to be: a. 8 billion c. 10 billion b. 9 billion d. 11 billion  ANS: A PTS: 1  4. The acronym USDA stands for the government agency known as: a. United States Department of Agriculture b. United States Department of Agriculture c. Universal Standards of Demarcation in America d. United States Development of Agriculture  ANS: A PTS: 1  5. What is the meaning of the Greek word bios? a. life c. environment b. study d. nature  ANS: A PTS: 1  6. The Greek word logy means to: a. study c. write b. work d. speak  ANS: A PTS: 1  7. Organic food is a term used for foods that have been grown: a. with limited use of chemical pesticides b. without use of chemical pesticides b. without use of chemical pesticides c. in freshly turned soil d. in controlled environments  ANS: B PTS: 1  8. Which terms refers to all the conditions, circumstances, and influences surrounding and affect organism or group of organisms? a. resources c. agronomy b. nature d. environment  ANS: D PTS: 1  9. The science involved in the cultivation, propagation, processing, and marketing of items such flowers and vegetables is known as: a. entomology c. horizulture d. ornamentation  ANS: C PTS: 1	2.	<ul><li>Which term refers to the study of the properties</li><li>a. Crop science</li><li>b. Plant science technology</li></ul>	c.	d management of soil to grow plants? Agricultural engineering Soil science
a. 8 billion b. 9 billion c. 10 billion d. 11 billion ANS: A PTS: 1  4. The acronym USDA stands for the government agency known as: a. United States Department of Agriculture b. United States Division of Agriculture c. Universal Standards of Demarcation in America d. United States Development of Agriculture ANS: A PTS: 1  5. What is the meaning of the Greek word bios? a. life c. environment b. study d. nature  ANS: A PTS: 1  6. The Greek word logy means to: a. study c. write b. work d. speak ANS: A PTS: 1  7. Organic food is a term used for foods that have been grown: a. with limited use of chemical pesticides b. without use of chemical pesticides c. in freshly turned soil d. in controlled environments ANS: B PTS: 1  8. Which terms refers to all the conditions, circumstances, and influences surrounding and affectorganism or group of organisms? a. resources c. agronomy b. nature d. environment ANS: D PTS: 1  9. The science involved in the cultivation, propagation, processing, and marketing of items such flowers and vegetables is known as: a. entomology c. horticulture b. agronomy d. ornamentation ANS: C PTS: 1		ANS: D PTS: 1		
4. The acronym USDA stands for the government agency known as: a. United States Department of Agriculture b. United States Division of Agriculture c. Universal Standards of Demarcation in America d. United States Development of Agriculture ANS: A PTS: 1  5. What is the meaning of the Greek word bios? a. life c. environment b. study d. nature ANS: A PTS: 1  6. The Greek word logy means to: a. study c. write b. work d. speak ANS: A PTS: 1  7. Organic food is a term used for foods that have been grown: a. with limited use of chemical pesticides b. without use of chemical pesticides c. in freshly turned soil d. in controlled environments ANS: B PTS: 1  8. Which terms refers to all the conditions, circumstances, and influences surrounding and affectorganism or group of organisms? a. resources c. agronomy b. nature d. environment ANS: D PTS: 1  9. The science involved in the cultivation, propagation, processing, and marketing of items such flowers and vegetables is known as: a. entomology c. horticulture b. agronomy d. ornamentation ANS: C PTS: 1	3.	a. 8 billion	c.	10 billion

### **COMPLETION**

1.	The U.S. Department of Education has used the phrase "agriculture/agribusiness and renewable natural resources" to refer to the broad range of activities in					
	ANS: agriculture					
	PTS: 1					
2.	Biology, chemistry, and are the three basic sciences used in agriscience.					
	ANS: biochemistry					
	PTS: 1					
3.	The key to an adequate food supply for the growing human population in the new millennium is agricultural					
	ANS: research					
	PTS: 1					
1.	The River water-control projects have permitted the transformation of the American Southwest from a desert to irrigated lands.					
	ANS: Colorado					
	PTS: 1					
5.	pest management refers to combining two or more different control methods to control insects, diseases, rodents, and other pests.					
	ANS: Integrated					
	PTS: 1					

### **MATCHING**

Match each of the following definitions with their related terms.

- a. science of soil management and crops
- b. plant grown for appearance and beauty
- c. management of agricultural resources
- d. science of fruits, vegetables, and ornamentals
- e. sciences of animal growth, care and management
- f. growing and managing living things in water
- g. application of mechanical and other engineering principles in agriculture
- h. grass used for decorative and soil-holding purposes
- i. science of insect life
- j. commercial firms developed in support of agriculture

- 1. entomology
- 2. horticulture
- 3. agronomy
- 4. animal sciences
- 5. agricultural economics
- 6. agricultural engineering
- 7. aquaculture
- 8. agribusiness
- 9. ornamental
- 10. turf

1.	ANS:	I	PTS:	1
2.	ANS:	D	PTS:	1
3.	ANS:	A	PTS:	1
4.	ANS:	E	PTS:	1
5.	ANS:	C	PTS:	1
6.	ANS:	G	PTS:	1
7.	ANS:	F	PTS:	1
8.	ANS:	J	PTS:	1
9.	ANS:	В	PTS:	1
10.	ANS:	Н	PTS:	1

#### SHORT ANSWER

1. List five areas of agriscience.

#### ANS:

Agriscience includes many endeavors. Some of these are aquaculture, agricultural engineering, animal science technology, crop science, soil science, biotechnology, integrated pest management, organic foods, water resources, and environment.

PTS: 1

2. Define biotechnology.

#### ANS:

Biotechnology refers to the management of the genetic characteristics transmitted from one generation to another and its application to our needs. It may be defined as the use of cells or components of cells to produce products and processes.

PTS: 1

3. What is meant by an agricultural education?

#### ANS:

Agricultural education is a unique program available to students. It offers organized instruction, supervised agricultural experience (SAE), FFA, and extension education activities. Agricultural communications, journalism, and community development are also components of agricultural education.

PTS: 1

## Test Bank for Agriscience Fundamentals and Applications 6th Edition by Burton

Full Download: http://downloadlink.org/product/test-bank-for-agriscience-fundamentals-and-applications-6th-edition-by-burton/

4. Define the purpose of an applied science, and give some examples.

### ANS:

Applied science uses the basic sciences in practical ways. Examples include entomology, agronomy, horticulture, and the animal sciences.

PTS: 1

5. What are the animal sciences and what is the primary goal of animal scientists?

### ANS:

The animal sciences are applied sciences that involve growth, care, and management of domestic livestock. They include veterinary medicine, animal nutrition, animal reproduction, and animal production and care. Animal scientists work to discover scientific principles related to animals. Scientific principles are then applied to animal management plans to improve animal health and production.
