ESSAY

16. What are business ethics and why are they important?

ANS:

Business ethics are standards of conduct and moral values that govern actions and decisions in the work environment. They are important because a company cannot prosper in the long run without considering ethics. Business ethics are also shaped by the ethical climate within an organization. Codes of conduct and ethical standards play increasingly significant roles in businesses in which doing the right thing is both supported and applauded.

DIF: EASY	LO:	2.1	Section:	Explain the concern for ethical
and societal issues.			AACSB	Ethical understanding and
reasoning		BT:	С	

17. List and describe three possible guidelines for business etiquette.

ANS:

Responses will vary. The following are three examples:

- *To stay focused on business purpose.* If one develops a close personal relationship with a client or supplier, one may risk a conflict of interest.
- *To not abuse privileges.* It's tempting to use sick days or personal days for mini-vacations, but if a company distinguishes between these breaks, then one should too.
- *To live according to the values.* Few people are brought up to be untrustworthy. Even if no one knows about it, an unethical choice that betrays one's personal values weakens one's self-respect and reduces one's contribution to the workplace.

DIF: MEDIUM	LO:	2.2	Section:	Describe the contemporary
ethical environme	nt.		AACSB	Ethical understanding and
reasoning		BT:	С	

18. List and briefly describe the three stages of moral and ethical development.

ANS:

The three stages of moral and ethical development are preconventional, conventional, and postconventional. In the preconventional stage, individuals primarily consider their own needs and desires in making decisions. They obey rules only because they are afraid of the consequences. The next stage is the conventional stage. Individuals are aware of and act in response to their duties to others (family or an organization, for example). Self-interest still plays a role. The final stage is the postconventional stage. In this stage, the individual is able to move beyond self-interest and take the larger needs of society into account as well.

19. Describe the factors that influence an individual's business ethics.

ANS:

An individual's business ethics is shaped by a huge number of factors. Experiences help shape responses to different situations. A person's family, educational, cultural, and religious backgrounds also can play a role, as can the environment within the firm. Ethical climate of the company also plays a role.

20. Describe examples of honesty and integrity violations in the workforce.

ANS:

Some people misrepresent their academic credentials and previous work experience on their résumés or job applications. Although it may seem tempting to embellish a résumé in a competitive job market, the act shows a lack of honesty and integrity—and eventually it will catch up with those using such methods to boost their resumes. A recent news report details how a college football coach resigned after information on his biography was questioned. Others steal from their employers by taking home supplies or products without permission or by carrying out personal business during the time they are being paid to work. For example, Internet misuse during the work day is increasing. Employees use the Internet for personal shopping, email, gaming, and social networking. This misuse costs U.S. companies an estimated \$85 billion annually in lost productivity.

21. How could loyalty versus truth create an ethical dilemma for a businessperson?

ANS:

Businesses expect their employees to be loyal and to act in the best interests of the company. An ethical conflict can arise when an individual must decide between loyalty to the company and truthfulness in business relationships. But when the truth about a company is not favorable, an ethical conflict can arise.

22. Explain how state and federal laws protect whistle-blowers.

ANS:

With the Sarbanes-Oxley Act, an individual can be prosecuted for retaliating against an employee for taking concerns of unlawful conduct to a public official. In addition, private firms must provide procedures for anonymous reporting of accusations. In addition, whistle-blowers can seek protection under the False Claims Act, under which they can fi le a lawsuit on behalf

of the government if they believe that a company has somehow defrauded the government. Charges against health care companies for fraudulent billing for Medicare or Medicaid are examples of this type of lawsuit.

DIF: HARD	LO:	2.2	Section:	Describe the contemporary

23. What might a company's code of conduct include?

ANS:

At the most basic level, a code of conduct may simply specify ground rules for acceptable behavior, such as identifying the laws and regulations that employees must obey. Other companies use their codes of conduct to identify key corporate values and provide frameworks that guide employees as they resolve moral and ethical dilemmas. Some companies use these to guide employees' online behavior.

DIF: MEDIUM			Section:	Discuss how organizations

24. The development of a corporate culture to support business ethics happens on four levels. Explain each of the four levels.

ANS:

The four levels of development of a corporate culture to support business ethics are ethical awareness, ethical education, ethical action, and ethical leadership. Ethical awareness is the foundation of an ethical climate. Employees need help in identifying ethical problems and need guidance in how to respond. Ethical reasoning involves ethics training programs to provide employees with the tools they need to evaluate ethical dilemmas and arrive at suitable decisions. Ethical action involves the structures and procedures that firms establish to enable their employ-ees to follow ethical behavior. Companies encourage ethical action by providing support for employees faced with dilemmas, such as an employee hotline. Ethical leadership charges each employee at every level with the responsibility for being an ethical leader. This principle requires that all employees be personally committed to the company's core values and be willing to base their actions on them.

DIF:	HARD	LO:	2.3	Section:	Discuss how organized	zations
shape	ethical conduc	et.	AACSB	Ethical understa	anding and reasoning	BT:
	С					

25. Why is ethical leadership so important?

ANS:

Without supervisors and managers demonstrating ethical behavior, employees are not as likely to follow a set of ethical standards. An important way for business leaders to demonstrate ethical behavior is to admit when they are wrong and correct their organization's mistakes. Companies where managers set good examples have fewer incidences of unethical behavior, and employees report higher levels of satisfaction.

26. Explain social responsibility.

ANS:

In a general sense, social responsibility is management's acceptance of the obligation to consider profit, consumer satisfaction, and societal well-being of equal value in evaluating the firm's performance. It is the recognition that business must be concerned with the qualitative dimensions of consumer, employee, and societal benefits, as well as the quantitative measures of sales and profits, by which business performance is traditionally measured.

27. What is a social audit? Who conducts it?

ANS:

A social audit is a formal procedure to identify and evaluate all company activities that relate to social issues such as conservation, employment practices, environmental protection, and philanthropy. The audit informs management about how well the company is performing in these areas. Social audits often are conducted internally by firms. Outside groups, such as environmental organizations and public-interest groups, also conduct social audits.

29. What are the objectives of the consumerism?

ANS:

Consumerism refers to the public demand that that a business consider the wants and needs of its customers in making decisions. Consumerism is based on the belief that consumers have certain rights. President Kennedy summarized many of the ideals of consumerism in a speech in which he listed four basic consumer rights: the right to safety, the right to be informed, the right to choose, and the right to be heard.

30. Explain product liability and briefly describe what this means in terms of social responsibility.

ANS:

Product liability_refers to the responsibility of manufacturers for injuries and damages caused by their products. Items that lead to injuries, either directly or indirectly, can have disastrous consequences for their makers.

Many companies put their products through rigorous testing to avoid safety problems. Still, testing alone cannot foresee every eventuality. Companies must try to consider all possibilities and provide adequate warning of potential dangers.

31. Explain how the Food and Drug Administration (FDA) promotes the consumers' right to be informed.

ANS:

The Food and Drug Administration (FDA), which sets standards for advertising conducted by drug manufacturers, eased restrictions for prescription drug advertising on television. In print ads, drug makers are required to spell out potential side effects and the proper uses of prescription drugs. Because of the requirement to disclose this information, prescription drug television advertising was limited. Now, however, the FDA says drug ads on radio and television can directly promote a prescription drug's benefits if they provide a quick way for consumers to learn about side effects, such as displaying a toll-free number or Internet address.

32. Why do investors expect a firm to act ethically and exhibit social responsibility?

ANS:

Even though the primary purpose of a firm is to make a profit, investors also expect the firm to act ethically, as well as legally, and exhibit social responsibility. Investors know that the failure of a firm to act ethically, legally, or without a sense of social responsibility can result in substantial monetary losses to investors. For instance, ethical or legal problems can cause a sudden and substantial drop in a company's stock price.

33. Explain how state and federal agencies carry out their responsibilities of protecting investors from financial misdeeds. Include examples of specific organizations and agencies.

ANS:

At the federal level, the Securities and Exchange Commission (SEC) investigates suspicions of unethical or illegal behavior by publicly traded firms. It investigates accusations that a business is using faulty accounting practices to inaccurately portray its financial resources and profits to investors. Regulation FD (Fair Disclosure) is an SEC rule that requires publicly traded companies to announce major information to the general public, rather than first disclosing the information to selected major investors. The agency also operates an Office of Internet Enforcement to target fraud in online trading and online sales of stock by unlicensed sellers.
