

Chapter 02

The Political, Legal, and Technological Environment

True/False Questions

1. Individualism views the needs and goals of society at large as more important than individual desires.

Answer: False

Feedback: Individualism believes that people should be free to pursue economic and political endeavors without constraint. Collectivism, on the other hand, views the needs and goals of society at large as more important than individual desires.

AACSB: Analytic

Bloom's: Remember

Learning Objective: 02-01 INTRODUCE the basic political systems that characterize regions and countries around the world and offer brief examples of each and their implications for international management.

Level of Difficulty: 1 Easy

Topic: Political Environment

2. Fascism is an extreme form of socialism that was realized through violent revolution and was committed to the idea of a worldwide communist state.

Answer: False

Feedback: Fascism is an authoritarian political ideology that considers individual and other societal interests inferior to the needs of the state and seeks to forge a type of national unity, usually based on ethnic, religious, cultural, or racial attributes. Communism, however, is an extreme form of socialism that was realized through violent revolution and was committed to the idea of a worldwide communist state.

Learning Objective: 02-01 INTRODUCE the basic political systems that characterize regions and countries around the world and offer brief examples of each and their implications for international management.

Level of Difficulty: 1 Easy

Topic: Political Environment

3. Communism is an authoritarian political ideology that considers individual and other societal interests inferior to the needs of the state.

Answer: False

Feedback: Communism is an extreme form of socialism that was realized through violent revolution and was committed to the idea of a worldwide communist state. Fascism, on the other hand, is an authoritarian political ideology (generally tied to a mass movement) that considers individual and other societal interests inferior to the needs of the state and seeks to forge a type of national unity, usually based on ethnic, religious, cultural, or racial attributes.

AACSB: Analytic

Bloom's: Remember

Multiple Choice Questions

21. In the context of socialism, Karl Marx believed that:

- A. businesses should benefit at the expense of laborers.
- B. only a few individuals should benefit from businesses.
- C. societal classes should exist.
- D. governments should own businesses.

Answer: D

Feedback: Karl Marx believed that governments should own businesses because in a capitalistic society only a few would benefit, and it would probably be at the expense of others in the form of not paying wages due to laborers. He advocated a classless society where everything was essentially communal.

22. In the context of collectivism, the Greek philosopher Plato believed that:

- A. individual desires should be viewed as the most important.
- B. a classless society would help keep people focused on societal goals.
- C. individual rights should be secured.
- D. property should be commonly owned.

Answer: D

Feedback: In the context of collectivism, the Greek philosopher Plato believed that individual rights should be sacrificed and property should be commonly owned. Also, he believed that classes should still exist and that the best suited should rule over the people.

25. Adopters of individualism adhere to the philosophy that:

- A. people should be free to pursue economic and political endeavors without constraint.
- B. government interest should solely influence individual behavior.
- C. communism in its extreme form is realized through violent revolution.
- D. the needs and goals of society at large are more important compared to individual desires.

Answer: A

Feedback: Adopters of individualism adhere to the philosophy that people should be free to pursue economic and political endeavors without constraint. This means that government interest should not solely influence individual behavior. In a business context, this is synonymous with capitalism and is connected to a free-market society.

27. Identify a characteristic of social democracy.

- A. Achievement of goals through nonviolent revolution
- B. Transference of ownership of a business from individuals to a government
- C. Loyalty of an individual toward his or her nation
- D. Complete control over every facet of political and human life

Answer: A

Feedback: Social democracy refers to a socialist movement that achieved its goals through nonviolent revolution. While this system was pervasive in and had a great influence on such Western nations as Australia, France, Germany, Great Britain, Norway, Spain, and Sweden, as well as in India and Brazil at one time or another, in practice it was not as viable as anticipated.

37. When compared with domestic law, international law is less coherent because:

A. it contains unwritten understandings that arise from repeated interactions among nations.

B. its sources embody only the laws of individual countries concerned with disputes.

C. its sources embody only the treaties and conventions of individual countries concerned with any dispute.

D. it is derived from the Marxist socialist system and is highly influenced by the regulations prevalent in former communist countries.

Answer: A

Feedback: When compared with domestic law, international law is less coherent because it contains unwritten understandings that arise from repeated interactions among nations. Also, its sources embody not only the laws of individual countries concerned with any dispute but also treaties (universal, multilateral, or bilateral) and conventions (such as the Geneva Convention on Human Rights or the Vienna Convention of Diplomatic Security).

42. U.S. laws require equality in the workplace for all employees. U.S. citizens who take a job in Germany cannot sue their German employer under the provisions of U.S. law for failure to provide equal opportunity for them. This exemplifies the:

- A. principle of sovereignty.
- B. nationality principle.
- C. doctrine of comity.
- D. act of state doctrine.

Answer: A

Feedback: The principle of sovereignty implies that one country's court system cannot be used to rectify injustices or impose penalties in another country unless that country agrees. So while U.S. laws require equality in the workplace for all employees, U.S. citizens who take a job in Germany cannot sue their German employer under the provisions of U.S. law for failure to provide equal opportunity for them.

47. Since the passage of the Foreign Corrupt Practices Act (FCPA), investigations reveal that:

- A. U.S. exports to "bribe prone" countries decreased significantly.
- B. the act was unsuccessful in removing bribes as a key competitive tool from the Middle East.
- C. the act allowed the courts to fine but not imprison guilty parties.
- D. individual executives started getting increasingly targeted apart from corporations.

Answer: D

Feedback: Since the passage of the Foreign Corrupt Practices Act (FCPA), investigations reveal that individual executives started getting increasingly targeted along with corporations. Also, it was found that penalties imposed under the FCPA have skyrocketed, and violations have spurred a number of collateral civil actions.

48. In the context of bureaucratization, which of the following statements is true of Japan?

- A. Government controls are inefficient and need to be corrected to encourage multinational corporations to do business.
- B. Politicians are more interested in the long-term well-being of the nation as a whole than in the well-being of their own districts.
- C. Parochial actions are highly unlikely to create problems for multinational corporations trying to do business.
- D. The banking system is expansionary, and there is very little room for reformation.

Answer: A

Feedback: Japan is a good example of a very restrictive foreign bureaucracy in which bureaucratic government controls are inefficient and need to be corrected to encourage multinational corporations to do business here. In Japan, politicians are more interested in the well-being of their own districts than in the long-term well-being of the nation as a whole. In turn, parochial actions create problems for multinational corporations trying to do business there.

49. Many foreign governments applauded the investigations under the Foreign Corrupt Practices Act (FCPA) because it helped them:

- A. crack down on corruption in their own country.
- B. reduce internal political problems for U.S. allies.
- C. reduce the risks associated with the derivatives activities of banks.
- D. restrict the courts from fining and not imprisoning corrupt parties.

Answer: A

Feedback: Many foreign governments applauded the investigations under the Foreign Corrupt Practices Act (FCPA) because it helped them crack down on corruption in their own country. This was an interesting development that occurred despite political sensitivity.

51. Keith, a manager in the country of Bodonia, violates a Bodonian law while traveling abroad. He can still be found guilty in Bodonia. This scenario exemplifies _____.

- A. socialist law
- B. Islamic law
- C. the principle of sovereignty
- D. the nationality principle

Answer: D

Feedback: This scenario exemplifies the nationality principle. It holds that every country has jurisdiction (authority or power) over its citizens no matter where they are located. Thus, Bodonia has jurisdiction over Keith even when he violates a Bodonian law while travelling abroad.

52. In the context of bureaucratization, Japanese businesses are becoming aware of the fact that:

- A. they are heavily dependent on their local market for maximum number of goods and services.
- B. local consumers are paying a heavy price due to the bureaucratic red tape.
- C. government bureaucracy has created a true sense of security.
- D. they are well prepared to face the harsh competitive realities of the international marketplace.

Answer: B

Feedback: Japanese businesses are becoming increasingly aware of the fact that they are dependent on the world market for many goods and services and that when bureaucratic red tape drives up the costs of these purchases, local consumers pay the price. These businesses are also beginning to realize that government bureaucracy can create a false sense of security and leave them unprepared to face the harsh competitive realities of the international marketplace.

- A. the nationality principle
- B. the protective principle
- C. socialist law

D. Islamic law

Answer: B

Feedback: This scenario exemplifies the protective principle. It holds that every country has jurisdiction over behavior that adversely affects its national security, even if that conduct occurred outside the country. The selling of secret government blueprints for a satellite system by a firm in the country of Batangonia affects the national security of Cambrialand. Thus, the firm can be subjected to Cambrialand laws.

A. socialist law

B. the nationality principle

C. the territoriality principle

D. Islamic law

Answer: C

Feedback: This scenario exemplifies the territoriality principle. It holds that every nation has the right of jurisdiction within its legal territory. Thus, the country of Octavia has the right of jurisdiction even when a firm based in the country of Iskoolbia sells a defective hair dryer within the Octavian territory.

Essay Questions

71. Explain the political system of totalitarianism, and identify its features and forms.

Answer: Totalitarianism refers to a political system in which there is only one representative party which exhibits control over every facet of political and human life. Power is often maintained by suppression of opposition, which can be violent in nature. Media censorship, political repression and denial of rights and civil liberties are dominant ideals. Since only one party within each entity exists, there are many forms of totalitarian government. All forms of totalitarianism exhibit some form of oppression as well. Parties or individuals that govern an entity based on religious principles will ultimately oppress religious and political expression of its citizens. One final consideration of a totalitarian system is that in which some freedoms may exist. This form has been referred to as right-wing totalitarianism, where some economic freedoms may exist, but there is still a limitation on political freedom. This structure allows for economic freedom because otherwise it is believed that complete oppression will give rise to

communism. While it directly opposes socialist and communist ideas, this form of ruling may gain power and support from the military, often in the form of a military leader imposing a government "for the good of the people." This results in military officers filling most government positions.

AACSB: Analytic

72. List the four foundations on which laws are based around the world, and briefly explain each foundation.

Answer: The four foundations upon which laws are based around the world are as follows: Islamic law, socialist law, common law and civil or code law. Islamic law is derived from interpretation of the Qur'an and the teachings of the Prophet Mohammed. It is found in most Islamic countries in the Middle East and Central Asia. Socialist law comes from the Marxist socialist system and continues to influence regulations in former communist countries, especially those from the former Soviet Union, as well as present-day China, Vietnam, North Korea, and Cuba. Common law comes from English law and is the foundation of the legal system in the United States, Canada, England, Australia, New Zealand, and other nations. Civil or code law is derived from Roman law and is found in the non-Islamic and nonsocialist countries such as France, some countries in Latin America and even Louisiana in the United States.

73. Discuss the three types of jurisdictional principles provided by International Law.

Answer: International law provides for three types of jurisdictional principles. The first is the nationality principle, which holds that every country has jurisdiction (authority or power) over its citizens no matter where they are located. Therefore, a U.S. manager who violates the American Foreign Corrupt Practices Act while traveling abroad can be found guilty in the United States. The second is the territoriality principle, which holds that every nation has the right of jurisdiction within its legal territory. Therefore, a German firm that sells a defective product in England can be sued under English law even though the company is headquartered outside England. The third is the protective principle, which holds that every country has jurisdiction over behavior that adversely affects its national security, even if that conduct occurred outside the country. Therefore, a French firm that sells secret U.S. government blueprints for a satellite system can be subjected to U.S. laws.

75. What is biotechnology? Discuss some of the areas in which it has been used or is likely to be used.

Answer: Biotechnology is the integration of science and technology, but more specifically it is the creation of agricultural or medical products through industrial use and manipulation of living organisms.

One area in which it has been used is medicine. While pharmaceutical companies mainly manufacture drugs through a process similar to that of organic chemistry, biotech companies attempt to discover genetic abnormalities or medicinal solutions through exploring organisms at the molecular level or formulating compounds from inorganic materials that mirror organic substances.

Another aspect of biotech research is geared toward agriculture. Demand for ethanol in the United States is on the rise due to uncertain future oil supplies, making corn-derived ethanol a viable alternative. Using corn as a fuel alternative will not only increase the cost of fuel but also create an imbalance between consumable corn and stock used for biofuel.

Aside from crops, the meat industry can also benefit from this process. The outbreak of mad cow disease in Great Britain sparked concern when evidence of the disease spread throughout Western Europe; however, the collaborative work of researchers in the United States and Japan may have engineered a solution to the problem by eliminating the gene which is the predecessor to making the animal susceptible to this ailment. Hunger and poor health care are worldwide issues and advancement in global biotechnology is working to raise the standards.
