Chapter 02 - Where to Start

Chapter 02 Where to Start

Multiple Choice Questions

- 1. A hypothesis is a:
- A. statement that has already been confirmed by the results of a study.
- **B.** tentative statement about something that may be true.
- C. fact that has been demonstrated to exist or known to exist.
- D. scientific law that is often represented by mathematical formula.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction.

Topic: Research questions, Hypotheses, and Predictions

- 2. A researcher poses the following question: "Does the breed of a dog determine its ability to learn complex interactive skills?" This question is an example of a(n):
- A. hypothesis.
- B. prediction.
- C. forecast.
- D. axiom.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction.

Topic: Research questions, Hypotheses, and Predictions

- 3. What is the difference between a hypothesis and a prediction?
- A. A hypothesis is a narrow idea or question that is waiting for evidence to support or refute it, while a prediction is the broad research topic that questions existing knowledge.
- B. A hypothesis is a tentative idea or question that is waiting for evidence to support or refute it, while a prediction is the result of a particular research.
- **C.** A hypothesis is a tentative idea or question that is waiting for evidence to support or refute it, while a prediction is a guess at the outcome of a hypothesis.
- D. A hypothesis is a tentative idea or question that is waiting for evidence to support or refute it, while a prediction is the evidence that either supports or refutes that idea.

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction.

Topic: Research questions, Hypotheses, and Predictions

- 4. A study is conducted to confirm the statement "Punishment will be harsher for drunk drivers who cause serious injuries than for drivers who cause mild injuries." This statement which is a guess at the outcome of a hypothesis is an example of a:
- A. theory.
- **B.** prediction.
- C. scientific law.
- D. research question.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Easy

Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction.

Topic: Research questions, Hypotheses, and Predictions

- 5. A researcher designs a study to examine the relationship between gender and time spent talking in a group. According to the researcher, the outcome of the study is likely to be that males talk more than females in a gender-balanced group. The researcher's statement about the outcome of the study is an example of a:
- A. theory.
- B. research question.
- <u>C.</u> prediction.
- D. moral judgment.

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction.

Topic: Research questions, Hypotheses, and Predictions

- 6. Which of the following best represents a prediction?
- **<u>A.</u>** "Female defendants are more likely to receive shorter prison sentences than male defendants."
- B. "Are gender and judgments of criminal behavior related?"
- C. "Do ratings of social desirability vary according to gender?"
- D. "Male and female defendants involved in criminal cases are chosen as the participants of a study to determine the relationship between gender and judgments of criminal behavior."

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Medium

Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction.

Topic: Research questions, Hypotheses, and Predictions

7. The statement "Females are more likely to report greater incidences of sexual harassment than males" is an example of a, while the question "Do reported incidences of sexual harassment vary according to gender?" is an example of a(n) A. hypothesis; research question B. prediction; hypothesis C. guess; prediction D. rule; axiom
APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Understand Difficulty Level: Medium Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction. Topic: Research questions, Hypotheses, and Predictions
8. If the prediction "Participants who consume alcohol will score lower on a reaction time test than participants who do not consume alcohol" is confirmed, we can say the hypothesis is A. tentative B. supported C. unalterable D. ambiguous
APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Understand Difficulty Level: Medium Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction. Topic: Research questions, Hypotheses, and Predictions

9. A(n) is a tentative idea or question that is waiting for evidence to support or refute is whereas a(n) is a guess about the outcome of a hypothesis. A. prediction; scientific law B. hypothesis; prediction C. guess; research question D. research question; axiom
APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Remember Difficulty Level: Easy Learning Objective: 02-01 Discuss how a hypothesis differs from a prediction. Topic: Research questions, Hypotheses, and Predictions
10. Deena, a research student, decides to test the proverb "Birds of a feather flock together" a part of her research project. In this scenario, is most likely to be the initial source of Deena's idea. A. practical problems B. past research C. scientific theory D. common sense
APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Apply Difficulty Level: Medium Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past research; and practical problems. Topic: Sources of Ideas
 11. Testing common sense ideas: A. is of little value because it consists of things we already know are true. B. never results in new knowledge. C. should only be done if a theory has been developed. D. is valuable because such notions often turn out to be incorrect.

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

- 12. Sean, a psychologist, watches a group of teenagers listen to a rock band and decides to conduct a research on the effects of music videos on children and adolescents. In this case, the initial source of idea for the research is:
- A. common sense.
- B. past research.
- **C.** the world around.
- D. a theory.

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

- 13. A professor conducts a study on tipping behavior in restaurants and hotels, which is designed to determine whether factors such as posture and communication influence tips left by customers. He conducts this study based on his experience in working at a restaurant as a youth. From this scenario, it can be inferred that the initial idea for the professor's study stems from:
- A. past research.
- B. his common sense and intuition or gut feeling.
- C. a scientific theory.
- **D.** his observation of an actual event.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

- 14. Which of the following best illustrates a research idea that originates from the observation of the world?
- **<u>A.</u>** A researcher studies the relationship between music lyrics and early sexual behavior among adolescents after watching a group listen to music.
- B. A researcher uses the theory of evolution to investigate and come up with solutions to solve the problem of endangered species that are close to becoming extinct.
- C. A researcher advances the work done by authors in 1988.
- D. A researcher decides to test the validity of the proverb "Birds of a feather flock together."

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

- 15. A researcher who reads the study on cell phone use by Cramer et. al., decides to conduct a study to find ways to reduce cell phone use while driving. Which of the following sources of idea is best illustrated in this scenario?
- A. Past research
- B. Observation of the world
- C. Common sense
- D. Myth

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

16. A researcher is asked to guide the formulation of public policy on obesity. She conducts a
research on the prevalent eating disorders. In this scenario, the idea behind the research
originates from .

A. past research

B. practical problems

C. theories

D. common sense

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

- 17. When an interesting discovery, such as Pavlov's phenomenon of classical conditioning, is a result of an accident or luck, this finding can be attributed to:
- A. directive research.
- B. purposeful research.

C. serendipity.

D. inquisition.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

18. A(n) _____ consists of a systematic body of ideas about a particular topic or phenomenon.

A. intuition

B. hunch

C. premonition

D. theory

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

19. A theory:

A. generates new knowledge by guiding our observations.

- B. is proven after many studies support its predictions.
- C. is called a fact when it refutes a hypothesis.
- D. remains unchanged once formed.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-03 Identify the two functions of a theory.

Topic: Sources of Ideas

20. Which of the following statements is true of a theory?

A. It is used to organize and explain specific facts.

- B. It is invariably the same as a hypothesis.
- C. It can only be expressed as a mathematical formula.
- D. It cannot be modified to account for new data.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-03 Identify the two functions of a theory.

- 21. The scientific meaning of the term "theory" is:
- A. essentially the same as a hypothesis.
- B. valid only if the theory can be proven.
- **C.** grounded in data from prior research.
- D. "just an idea" even if there are numerous hypotheses that support it.

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

- 22. When the results of an experiment are consistent with a prediction developed from a theory, we conclude that the theory is:
- A. proven to be a hypothesis.
- **B.** supported by the results.
- C. established as a fact and cannot be challenged.
- D. neither supported nor challenged by the results.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

- 23. Which of the following statements is true of theories?
- A. Theories can only be expressed as mathematical formulae.
- B. Theories are supported by proving a fact.
- **C.** Theories can be reevaluated.
- D. Theories are proven by confirming a prediction.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

24. As Joan becomes familiar with the literature examining the influence of physical attractiveness on judgments of criminal behavior, she notes inconsistencies in the results. She concludes that this area of study needs to be further investigated. This scenario best represents _____ as a source of ideas for research.

A. observation of the world around us

B. theories

C. practical problems

D. past research

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

25. An advantage of using past research as a source of ideas for research is that:

A. new ideas are often generated from old ones.

- B. new ideas are easily proved through experiments when compared to other sources of ideas.
- C. new ideas do not require formulation of hypotheses to be supported.
- D. new ideas are readily accepted without empirical evidence.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

26. A scientist intends to study alternative explanations for the theories on the origin of the
universe as he finds the existing theories to be fallacious. This scenario is an example of using
as an initial source of idea.

A. myths

B. observation of an actual event

C. past research

D. common sense

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

Topic: Sources of Ideas

27. In view of the existing tension between the police department and the citizens of Metropolis, the city council conducts a survey among the residents for suggestions on how to improve police-community relations. This example best illustrates _____ as a source of research ideas.

A. myths

B. theories

C. past research works

D. practical problems

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Medium

Learning Objective: 02-02 Describe the different sources of ideas for research; including common sense; observation; theories; past

research; and practical problems.

28. The American Psychological Association computer database that stores the contents of Psychological Abstracts is:

A. PsycINFO.

- B. Psychological Abstracts.
- C. Social Science Citation Index (SSCI).
- D. PubPsyc.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 29. Which of the following would be included in the default output when searching the PsycINFO with key terms?
- A. Only those articles that have the specified key terms in a particular field
- B. All articles that are relevant to the researcher conducting the research irrespective of whether they have the key terms
- C. All articles that have that word or phrase anywhere in any of the fields listed
- D. Only those articles that have that word or phrase and are relevant to the researcher conducting the research

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

- 30. A student conducts a literature search for articles about the relationship between right/left hand dominance and creativity. She finds an article that is directly relevant to her topic of research. Which of the following resources is she most likely to use to find a bibliography of articles relevant to the original article?
- A. Psychological Abstracts
- B. Annual Review of Psychology
- C. Social Science Citation Index
- D. PsycINFO

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Hard

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 31. Using the Boolean operator OR when performing a search on PsycINFO will:
- A. include sources that contain all the search terms specified.
- **B.** expand the search.
- C. exclude sources that contain the search terms specified.
- D. have no effect on the search.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 32. Using the Boolean operator AND when performing a search on PsycINFO will:
- **A.** include sources that contain all the search terms specified.
- B. include sources that contain either one of the search terms specified.
- C. exclude sources that contain the search terms specified.
- D. have no effect on the search.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

- 33. When conducting a search for previous literature using PsychINFO, one:
- A. can use the OR operator to include those sources that contain all the search terms specified.
- B. should avoid using standard psychological terms.
- C. can use the NOT operator to exclude sources that contain the search terms specified.
- D. should avoid using the Boolean operators.

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 34. In the context of conducting a PsycINFO search, an advantage of using the asterisk (*) is that:
- A. it returns a bibliography of articles.
- B. it returns only the "key article" related to a topic.
- **C.** it expands the scope of a search.
- D. it includes only those articles that are relevant to the researcher conducting the research.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 35. To find out how many authors have referred to a particular article in the years since it was published, one would consult:
- A. Psychological Abstracts.
- B. Annual Review of Psychology.
- C. Psychological Bulletin.
- **D.** Social Science Citation Index (SSCI).

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

- 36. One advantage of using the Social Science Citation Index (SSCI) as a source of locating previous research is it:
- A. excludes the articles that have already been viewed by the researcher conducting the research.
- B. does not require one to identify a "key article."
- C. gives the references and abstracts of articles related to the topic published before a "key article."
- **<u>D.</u>** allows one to search for subsequent articles that have referred to a "key article."

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 37. In the context of exploring past research, which of the following strategies should a researcher employ?
- A. Use a single database.
- B. Avoid using the words review and meta-analysis in the title of an article.
- C. Avoid using the "cited references" information provided by Google Scholar.
- **D.** Use a variety of key words.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 38. Which of the following PsycINFO search strategies should be employed by researchers?
- A. Avoid using AND to limit a search.
- B. Avoid using NOT to exclude search terms.
- C. Use fields such as the TITLE and AUTHOR.
- D. Use OR to limit a search.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

- 39. Which of the following Google search strategies would help researchers in conducting their research efficiently?
- A. Specify a set of search words marked with "asterisk" to include only relevant sources.
- B. Specify a set of "AND" words or phrases to expand a search.
- C. Specify a set of "NOT" words or phrases to limit a search.
- D. Specify a set of "OR" words or phrases to limit a search.

APA Outcome: 1.3 Engage in innovative and integrative thinking and problem solving

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 40. How can one improve the quality of the search results when using Internet search services such as Google?
- A. By avoiding the use of Boolean operators
- B. By using search terms that are broad
- C. By learning how to find exact phrases
- D. By avoiding the use of advanced search rules as they are meant only for statisticians

APA	Outcome:	1.3	Engage	in	innovative	and	integrative	thinking	and	problem	solving
-----	----------	-----	--------	----	------------	-----	-------------	----------	-----	---------	---------

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 41. Google Scholar is a specialized search engine that allows one to _____.
- A. search for psychology related articles only
- B. search for biographies of authors alone
- C. purchase a research paper or a scholarly journal for his or her own use
- **D.** locate published works on a particular topic on the entire Internet

APA Outcome: 1.3 Engage in innovative and integrative thinking and problem solving

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

- 42. Which of the following statements is true of Google Scholar?
- A. It can be accessed only through Internet Explorer.
- B. It is a paid service which requires an annual subscription.
- C. It ranks a search output by the contents of an article along with its overall prominence.
- D. It includes content from published works solely in the field of psychology and related sciences.

Accessibility: Keyboard Navigation

Blooms: Understand Difficulty Level: Medium

Learning Objective: 02-04 Summarize the fundamentals of conducting library research in psychology; including the use of PsycINFO.

Topic: Exploring Past Research

- 43. In which section of a research article would a reader find a summary of the entire project?
- **A.** The abstract
- B. The references
- C. The method section
- D. The results section

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

Topic: Anatomy of a Research Article

- 44. Which section of a research article summarizes the hypothesis, the procedure, conclusions, and discussion usually in 120 words or less?
- A. The method section
- B. The bibliography
- **C.** The abstract
- D. The results section

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

 $research\ articles.$

- 45. Which section of a research article is most likely to include the specific expectations of a researcher as formal hypotheses?
- **A.** The introduction
- B. The method section
- C. The bibliography
- D. The references

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

Topic: Anatomy of a Research Article

- 46. In which section of a research article would a reader find a description of what was done in the past and why the present study is being conducted?
- A. The abstract
- **B.** The introduction
- C. The method section
- D. The results section

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

- 47. Which section of a research article includes a description of exactly how the study was designed and conducted?
- A. The introduction
- **B.** The method section
- C. The results section
- D. The discussion section

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

Topic: Anatomy of a Research Article

- 48. In which section of a research article would a researcher present the findings using statistical language?
- A. The references section
- B. The bibliography
- C. The method section
- **D.** The results section

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

- 49. In which section of a research article does a researcher review the research from various perspectives, give all possible explanations for the results, and elaborate on why one explanation is superior to another?
- A. The introduction
- B. The method section
- C. The results section
- **D.** The discussion section

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

Topic: Anatomy of a Research Article

- 50. In which section of a research article is a reader most likely to find suggestions for possible practical applications of the research and for future research on the topic?
- A. The introduction
- B. The method section
- C. The results section
- **D.** The discussion section

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

- 51. Which of the following is included in the method section of a research report?
- A. A review of theories and prior findings relevant to the research
- B. A prediction about the results
- C. A summary of past research
- **<u>D.</u>** A description of the characteristics of participants

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Remember

Blooms: Remember Difficulty Level: Easy

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

Topic: Anatomy of a Research Article

52. Victor is writing a section of a research report that shows how past research and theory are connected to the current research problem and expected results. Victor is most likely writing the _____ section of the research report.

A. introduction

B. method

C. results

D. discussion

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research

Accessibility: Keyboard Navigation

Blooms: Apply

Difficulty Level: Medium

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

53. Juan is writing a section of a research report that describes who participated in the research along with a description of how the study was conducted. Juan is most likely to be writing the section of the research report. A. introduction
B. method
C. results
D. discussion
APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Apply Difficulty Level: Medium Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of research articles. Topic: Anatomy of a Research Article
54. Kathy is writing a section of a research report in which she explains the possible reasons for results in her study and suggestions for practical applications of the research and future research ideas. Kathy is most likely to be writing the section. A. introduction B. method C. results D. discussion
APA Outcome: 1.4 Interpret, design, and conduct basic psychological research Accessibility: Keyboard Navigation Blooms: Apply Difficulty Level: Medium Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of research articles. Tonic: Anatomy of a Research Article

- 55. Which one of the following statements would be appropriate for the method section of a research report?
- A. Past research shows that men generally talk more than women.
- B. For men, the average time spent talking was 10.7 minutes while for women the average was 7.4 minutes.
- **C.** While three men and three women discussed an issue, an experimenter measured time spent talking by using a stopwatch.
- D. Contrary to popular belief, in groups of mixed gender, men talk more than women, interrupt more than women, and are more likely to direct discussion topics.

Accessibility: Keyboard Navigation

Blooms: Apply Difficulty Level: Hard

Learning Objective: 02-05 Summarize the information included in the abstract; introduction; method; results; and discussion sections of

research articles.

Topic: Anatomy of a Research Article

- 56. Which one of the following statements would be appropriate for the results section of a research report?
- A. The difference between social desirability ratings of attractive versus unattractive individuals may be explained by the Cognitive Consistency Theory.
- B. Past research suggests that differences exist in ratings of social desirability assigned to attractive versus unattractive individuals.
- **C.** The average social desirability rating for attractive individuals was 6.4; however, the average rating for unattractive individuals was 3.2.
- D. Future research should examine the effect of attractiveness on judgments of criminal behavior.

APA Outcome: 1.4 Interpret, design, and conduct basic psychological research
