74. If you need to use a custom theme frequently, you can store this file so that it appears in the Themes gallery on the DESIGN tab. Please describe how you go about saving a theme so that it appears in your Themes gallery.

ANSWER: To save a custom theme, click the FILE tab, click Save As in the navigation bar, and then click the

Browse button to open the Save As dialog box. To change the file type to Office Theme, click the Save as type arrow, and then click Office Theme. This changes the current folder in the Save As dialog box to the Document Themes folder, which is a folder created on the hard drive when Office is installed and where the installed themes are stored. If you save a custom theme to the Document Themes folder, that theme will be listed in its own row above the installed themes in the Themes gallery. (You need to click the More button in the Themes gallery to see this row.)

POINTS: 1

TOPICS: Critical Thinking

75. After you insert data into a table, you need to think about how the table looks and whether the table will be readable for the audience. What are some of the ways you can change the appearance of a table?

ANSWER: As with any text, you can change the font, size, or color, and as with shapes and pictures, you can apply

a style to a table. You can also change how the text fits in the table cells by changing the height of rows and the width of columns. You can also customize the formatting of the table by changing the border and

fill of table cells.
