2. As discussed in the text, examinations in ancient China for civil service positions were, for the most part,
- A. only open to men.**
 - B. only open to members of affluent families.
 - C. open to all citizens.
 - D. open to all citizens and immigrants.

Accessibility: Keyboard Navigation

3. In his clinical practice as a _____, Neil Krishan Aggarwal focuses on cultural aspects of mental health.
- A. psychologist
 - B. social worker
 - C. psychotherapist
 - D. psychiatrist**

Accessibility: Keyboard Navigation

4. According to Neil Krishan Aggarwal, culture influences
- A. when, where, how, and to whom patients narrate their experiences of distress.
 - B. the patterning of symptoms recognized as illnesses.
 - C. expectations about how long treatment should take.
 - D.** All of these.

Accessibility: Keyboard Navigation

5. To better focus on the cultural identity of a patient, a tool of assessment used by Neil Krishan Aggarwal is
- A. the MMPI.
 - B. the Culture-Specific Battery (CSB).
 - C.** the Cultural Formulation Interview (CFI).
 - D. the Culture Free Assessment Schedule (CFAS).

Accessibility: Keyboard Navigation

6. The *Common Core State Standards* was the product of
- A. a Department of Education mandate to create a nationwide K-12 curriculum.
 - B. a law passed in 1969 designed to go into effect at such time that No Child Left Behind expired.
 - C.** a state-led effort to bring inter-State uniformity to proficiency standards in various academic subjects.
 - D. All of these

Accessibility: Keyboard Navigation

7. The *Common Core State Standards* has been very controversial as evidenced by
- A. verbal attacks by politicians.
 - B. demonstrations by teachers.
 - C. demonstrations by parents.
 - D.** All of these.

Accessibility: Keyboard Navigation

8. Indirectly, the USSR's launch of Sputnik had the effect of
- A. increasing cold war fears and raising defense budgets.
 - B. galvanizing public interest in education and testing.**
 - C. compelling significant changes to the MMPI.
 - D. decreasing public skepticism with regard to the validity of the Myers-Briggs Type Indicator.

Accessibility: Keyboard Navigation

9. The ruling of the U.S. Supreme Court in the case of *Ricci v. DeStefano* had implications for the ways in which government agencies can
- A. disclose test scores to testtakers who have taken a psychological test.
 - B. use test data from applicants who have received vocational rehabilitation services.
 - C. institute race-conscious remedies in hiring and promotional practices.**
 - D. store and retain records of a psychological nature.

Accessibility: Keyboard Navigation

10. Many of the cases brought before federal courts under Title VII of the Civil Rights Act are employment *discrimination* cases. In this context, **discrimination** is defined as the practice of making distinctions in hiring, promotion, or other selection decisions that tend to systematically favor
- A. and preserve the civil rights of any United States citizen who has been convicted of a crime.
 - B. and give preference to bona fide and naturalized citizens of the United States.
 - C. members of a majority group regardless of actual qualifications for positions.**
 - D. members of any single group regardless of actual qualifications for positions.

Accessibility: Keyboard Navigation

11. Discrimination may occur as the result of
- A. intentional action on the part of an employer.
 - B. unintentional action on the part of an employer.
 - C.** both intentional action on the part of an employer and unintentional action on the part of an employer.
 - D. None of these

Accessibility: Keyboard Navigation

12. Typically, when a Title VII charge of discrimination in the workplace is leveled at an employer, a claim is made that hiring, promotion, or some related employment decisions are systematically being made
- A. without regard to race or ethnic background.
 - B. in accordance with undefined rules that favor one race or another.
 - C. that exclude military veterans from consideration for positions.
 - D.** on the basis of some non-job-related variable.

Accessibility: Keyboard Navigation

13. The practice of making distinctions in hiring, promotion, or other selection decisions that systematically tend to favor members of a minority group regardless of actual qualifications for a position is called
- A. discrimination.
 - B.** reverse discrimination.
 - C. compensation.
 - D. None of these.

Accessibility: Keyboard Navigation

14. The legal term **disparate treatment** refers to the consequence of an employer's hiring or promotion practice that

- A. was intentionally devised to yield some discriminatory result or outcome.
- B. unintentionally resulted in some discriminatory result or outcome.
- C. both was intentionally devised to yield some discriminatory result or outcome and unintentionally resulted in some discriminatory result or outcome.
- D. None of these.

Accessibility: Keyboard Navigation

15. The legal term **disparate impact** refers to the consequence of an employer's hiring or promotion practice that

- A. intentionally resulted in a discriminatory result.
- B. unintentionally resulted in a claim of libel.
- C. resulted in a claim of libel regardless of the employer's intent.
- D. None of these

Accessibility: Keyboard Navigation

16. When a claim of discrimination is made, an evaluation of the quality of a test or selection procedure will typically entail scrutiny of all of the following EXCEPT

- A. the competencies actually assessed by the test.
- B. the relation of competencies assessed to the job.
- C. differential weighting of items on the test.
- D. whether the test was true/false or multiple-choice.

Accessibility: Keyboard Navigation

17. Many large companies and organizations, as well as government agencies, hire experts in assessment to help make certain that their hiring and promotion practices result neither in disparate treatment nor disparate impact. This is so because

- A. the mere allegation of discrimination can be a source of great expense for any employer.
- B. being found guilty of disparate treatment has resulted in jail time for corporate employees.
- C. being found guilty of disparate impact has resulted in exorbitant fines to organizations.
- D. None of these.

Accessibility: Keyboard Navigation

18. An employer accused of discrimination under Title VII will typically have to budget for a number of expenses including all of the following EXCEPT

- A. the costs of fees paid to attorneys.
- B. the cost of fees paid to judges.
- C. the cost of retrieval, scanning and storage of records.
- D. the costs attendant to improving and restructuring hiring and promotion protocols.

Accessibility: Keyboard Navigation

19. When a test must be administered with an aid of a translator,

- A. subtle nuances of meaning may be "lost in translation."
- B. pre-training for the translator is desirable.
- C. pre-training for the assessor is desirable.
- D. All of these

Accessibility: Keyboard Navigation

20. "Does a court order for a compulsory psychiatric examination of the defendant in a criminal trial violate that defendant's fifth amendment right to avoid self-incrimination?" This was the question before the court in the case of

- A. *Mitchell v. State.*
- B. *Allen v. District of Columbia.*
- C. *Tarasoff v. Regents of the University of California.*
- D. *Jaffee v. Redmond.*

Accessibility: Keyboard Navigation

21. Persons diagnosed with different psychiatric disorders may have differing capacities to provide truly informed consent. A person suffering from which of the following disorders would have the BEST probability of providing truly informed consent?

- A. dementia
- B.** major depression
- C. schizophrenia
- D. bipolar disorder

Accessibility: Keyboard Navigation

22. The testing program that existed in China between 1115 b.c.e. and 1905 is most similar to which of the following today?

- A.** civil service testing
- B. college aptitude testing
- C. achievement testing
- D. drug abuse testing

Accessibility: Keyboard Navigation

23. As used in the text, the term *imperial examinations* refers to assessment for

- A. knighthood in the Middle Ages.
- B.** civil service in ancient China.
- C. competency to stand trial in Japan.
- D. gang membership in Newark, New Jersey.

Accessibility: Keyboard Navigation

24. Which defendant argued (unsuccessfully) in his appeal that his death penalty conviction should be set aside because he was suffering from a mental disease?

- A. Tarasoff
- B. Daubert
- C.** Zink
- D. Mitchell

Accessibility: Keyboard Navigation

25. During the Middle Ages, the focus of early "diagnostic techniques" was on identifying
- A. slow learners.
 - B. those who had scurvy.
 - C. witches.
 - D. competent civil service workers.

Accessibility: Keyboard Navigation

26. Which of the following positions would Galton support?
- A. Genius runs in families.
 - B. Environment is the most important determinant of genius.
 - C. Genius ruins families.
 - D. Darwin's theory was overstated.

Accessibility: Keyboard Navigation

27. How did the work of Wundt differ from that of Galton, Binet, and James McKeen Cattell?
- A. Wundt used standardized psychological tests.
 - B. Wundt utilized humans and not animal research subjects.
 - C. Wundt focused on how individuals were the same rather than different.
 - D. Wundt focused on how individuals were different rather than the same.

Accessibility: Keyboard Navigation

28. Who is credited with being the originator of the psychometric concept of *test reliability*?
- A. Spearman
 - B. Pearson
 - C. Kraepelin
 - D. Tichener

Accessibility: Keyboard Navigation

29. Who coined the term *mental test* in 1890?

- A. Binet
- B.** Cattell
- C. Wundt
- D. Galton

Accessibility: Keyboard Navigation

30. Much of 19th-century psychological measurement focused on

- A. intelligence.
- B. ethics and values.
- C.** sensory abilities.
- D. personality traits.

Accessibility: Keyboard Navigation

31. Which of the following would be LEAST likely to be used as an item on a projective test of personality?

- A. ink spilled on paper
- B. a painting of a rowboat on a lake
- C. a cloud
- D.** a digital clock

Accessibility: Keyboard Navigation

32. Projective tests may be viewed as remedying a deficiency of which other type of psychological test?

- A. intelligence tests
- B. proficiency tests
- C.** self-report tests
- D. neurological tests

Accessibility: Keyboard Navigation

33. In addition to his test-related "claim to fame," this man was the first football coach at the University of Southern California. He is, of course,

- A. Robert S. Woodworth.
- B. Henry H. Goddard.**
- C. Ovide DeCroly.
- D. Lightner Witmer.

Accessibility: Keyboard Navigation

34. Today, which of the following groups would be MOST likely to cite the research of Henry H. Goddard in literature it produces for public consumption?

- A. The Ku Klux Klan (KKK)**
- B. The American Civil Liberties Union (ACLU)
- C. The American Psychological Association (APA)
- D. The American Society for the Prevention of Cruelty to Animals (ASPCA)

Accessibility: Keyboard Navigation

35. Research published by Henry H. Goddard supported

- A. the pro-life movement.
- B. the anti-whaling movement.
- C. the eugenics movement.**
- D. the labor union movement.

Accessibility: Keyboard Navigation

36. The mental ability evaluations conducted at Ellis Island could best be characterized as

- A. psychological testing.**
- B. psychological assessment.
- C. case-study techniques.
- D. role-play.

Accessibility: Keyboard Navigation

37. Psychological test data gathered from immigrant assessees at Ellis Island by Henry Goddard was

- A. cited extensively in Goddard's best-seller *Welcoming Europe's Gifted*.
- B. used to argue against compulsory sterilization for the "feeble-minded."
- C.** cited to support anti-immigration arguments and legislation.
- D. compiled to determine the incidence of feeble-mindedness worldwide.

Accessibility: Keyboard Navigation

38. The beginning of the group intelligence testing movement is best associated with

- A. the need to identify slow learners in school.
- B. the need to identify the best applicant for a job.
- C.** the military's need to screen the intellectual ability of recruits.
- D. the civil service system's need to identify qualified postal workers.

Accessibility: Keyboard Navigation

39. In the 1930s, *clinical psychology* was synonymous with

- A. personality testing.
- B.** mental testing.
- C. vocational testing.
- D. educational testing.

Accessibility: Keyboard Navigation

40. Which of the following represents a problem unique to self-report personality tests?

- A.** Respondents might be unwilling to reveal something negative about themselves.
- B. Respondents may be too "low" on the construct being measured for the trait to register properly on the test.
- C. The reading ability of respondents may prevent them from responding accurately to items.
- D. All of these

Accessibility: Keyboard Navigation

41. An approach to personality assessment that does not employ self-report methods is referred to as

- A. a reflective method.
- B. a projective method.**
- C. a factorial method.
- D. a nonempirical method.

Accessibility: Keyboard Navigation

42. Which of the following was the first personality test to be developed after the first world war?

- A. the Bernreuter Personality Inventory
- B. the Mooney Problem Checklist
- C. the Personal Data Sheet**
- D. the MMPI

Accessibility: Keyboard Navigation

43. Henry A. Murray is the author of a "personology" theory of personality and is best associated with

- A. the Rorschach Inkblot Test.
- B. the Thematic Apperception Test.**
- C. the Draw-A-Person Technique.
- D. the Mooney Problem Checklist.

Accessibility: Keyboard Navigation

44. "Never shoot 'em in the back," "Do not fudge data," and "A captain goes down with his ship" are all BEST characterized under the general heading of

- A. laws.
- B. ethics.**
- C. rules.
- D. traditions.

Accessibility: Keyboard Navigation

45. A body of principles of "right," "proper," or "good" conduct is referred to as a body of
- A. laws.
 - B.** ethics.
 - C. traditions.
 - D. rules.

Accessibility: Keyboard Navigation

46. Which of the following terms BEST characterizes the relationship between the enterprise of psychological testing and the public during the 20th century?
- A. a love affair
 - B. just good friends
 - C. perfect strangers
 - D.** a stormy relationship

Accessibility: Keyboard Navigation

47. Which historical event was the impetus for the awarding of federal funds to schools in an effort to identify gifted and talented students?
- A. World War I
 - B. World War II
 - C.** the launch of Sputnik
 - D. the presidential election of 1960

Accessibility: Keyboard Navigation

48. Which of the following laws requires that an interpreter be available if necessary to provide job selection testing?
- A.** Americans with Disabilities Act of 1990
 - B. English as a Second Language Act of 1992
 - C. The Hobson and Hansen Amendment of 1991
 - D. Family Education Rights and Privacy Act of 1974

Accessibility: Keyboard Navigation

49. Tests relevant primarily to white middle-class students produce inaccurate and misleading test scores when administered to lower-class African-American students. This was the conclusion of a court in which of the following cases?

A. *Diana v. State Board of Education* (1970)

B. *Hobson v. Hansen* (1967)

C. *Larry P. v. Riles* (1979)

D. *Debra v. Turlington* (1981)

Accessibility: Keyboard Navigation

50. In which case was it ruled that all IQ tests used for placement in special education classes for the mentally retarded (developmentally disabled) must be administered in the language in which the student is most fluent?

A. *Diana v. State Board of Education* (1970)

B. *Hobson v. Hansen* (1967)

C. *Larry P. v. Riles* (1979)

D. *Smith v. School District of Montgomery County* (1951)

Accessibility: Keyboard Navigation

51. In which case was it ruled that IQ tests cannot be administered to African-American students for the purpose of placement in special education classes?

A. *Diana v. State Board of Education* (1970)

B. *Hobson v. Hansen* (1967)

C. *Larry P. v. Riles* (1979)

D. *Smith v. Board of Education* (1981)

Accessibility: Keyboard Navigation

52. In which case was it ruled that employment tests must measure the person for the specific job for which he or she is applying?

- A. *Allen v. District of Columbia* (1993)
- B. *Aderand Constructors, Inc. v. Pena et al.* (1985)
- C. *Griggs v. Duke Power Company* (1971)**
- D. *Grutter v. Bollinger, et al.* (2003)

Accessibility: Keyboard Navigation

53. *Griggs v. Duke Power Company* and *Albemarle Paper Company v. Moody* had what issue in common?

- A. the use of tests that discriminate against minorities because they do not measure the specific skills required for the job**
- B. the use of tests that discriminate against minorities in that they were unfairly used to terminate employment
- C. the use of tests that discriminate against minorities because examiners administering the tests were biased
- D. the use of tests that discriminate against minorities because the test data were used unfairly to determine promotions

Accessibility: Keyboard Navigation

54. In which court case did the court find that minimum competency testing in the State of Florida perpetuated the effects of past discrimination?

- A. *Diana v. State Board of Education* (1970)
- B. *Hobson v. Hansen* (1967)
- C. *Larry P. v. Riles* (1979)
- D. *Debra v. Turlington* (1981)**

Accessibility: Keyboard Navigation

55. What publication presents standards for constructing and using fair and non-discriminative employment tests?

- A. *Ethical Standards of Psychologists*
- B. *Guidelines for Fair and Nondiscriminative Employment Testing*
- C. *Uniform Guidelines on Employee Selection Procedures*
- D. *Specialty Guidelines in Administering and Interpreting Employment Tests*

Accessibility: Keyboard Navigation

56. Public concern about various aspects of psychological testing reached a peak in the

- A. 1940s.
- B. 1950s.
- C. 1960s.
- D. 1970s.

Accessibility: Keyboard Navigation

57. *The Family Rights and Privacy Act* mandated that

- A. parents and students have an opportunity to review their school records.
- B. all children have a right to attend private schools with public funds.
- C. parents and students have no right to challenge the content of school records.
- D. families who are victims of identity theft are eligible for special grants.

Accessibility: Keyboard Navigation

58. "Truth in testing" laws relate to tests typically administered in

- A. elementary and secondary school.
- B. nursery school.
- C. postsecondary and professional school.
- D. hair, makeup, and cosmetology academies.

Accessibility: Keyboard Navigation

59. Which of the following is a key provision in "truth in testing" legislation?

- A. Only tests approved by APA may be published.
- B. Answers keyed "correct" must indeed be correct.
- C. Two proofs of identification are required to sit for federal examinations.
- D.** Test questions and answers must be revealed to all testtakers.

Accessibility: Keyboard Navigation

60. Tests are categorized as

- A. level 1, 2, or 3, depending on how difficult it is to administer the test.
- B.** level A, B, and C, depending on how much testing-related knowledge is necessary to administer the test.
- C. level alpha, beta, or gamma, depending on how many years of education are required by testtakers to be admitted for testing.
- D. "thumbs up" or "thumbs down" by the APA Council on Testing.

Accessibility: Keyboard Navigation

61. According to *the Standards for Educational and Psychological Tests and Manuals*, the responsibility for the use of psychological tests is that of

- A. professionals with the highest academic degree in psychology.
- B.** professionals with the necessary training and experience.
- C. professionals who have state certification to administer a particular test.
- D. professionals who are employed by duly accredited institutions and organizations.

Accessibility: Keyboard Navigation

62. *The Code of Fair Testing Practices in Education* was developed and endorsed by

- A. test publishers.
- B. professional organizations.
- C. Congress.
- D.** Both test publishers and professional organizations.

Accessibility: Keyboard Navigation

63. What assumption can reasonably be made when a well-known, well-respected, and widely used test is translated from English into another language?

- A. The test will likely become well known, well respected, and widely used in all of the countries throughout the world that speak the language into which the test was translated.
- B. The test will be equivalent in content in all of the languages for which it has been translated.
- C. The translated test will conform to the letter but not the "spirit" of the original.
- D.** None of these

Accessibility: Keyboard Navigation

64. Which of the following statements is NOT true about Henry Goddard?

- A. He raised questions about how meaningful intelligence tests were for people of diverse backgrounds.
- B. He used intelligence test data to argue against capital punishment for the "feeble-minded."
- C. He advocated for the institutionalization or sterilization of the mentally retarded to prevent future generations from having low intelligence.
- D.** He developed a culturally sensitive intelligence test that measured culturally specific aspects of intelligence common to East Asian immigrants.

Accessibility: Keyboard Navigation

65. A client tells his psychologist that he is planning to kill his girlfriend. The psychologist has reason to believe that the client will act on this plan. In this situation, the psychologist has a duty to

- A. keep the information privileged and address the problem in therapy.
- B. keep the information confidential and address the problem in therapy.
- C.** warn the endangered third party or call the police.
- D. contact the client for an emergency session to explore the client's motivation and plan of action.

Accessibility: Keyboard Navigation

66. In general, testtakers have the right
- A. to know why they are being tested.
 - B. to know the results of the test they took.
 - C. to know how the test data will be used.
 - D.** All of these

Accessibility: Keyboard Navigation

67. The "privilege" referred to in the term *privileged communication* belongs to
- A. the test developer.
 - B. the test user.
 - C.** the testtaker.
 - D. the test publisher.

Accessibility: Keyboard Navigation

68. Regarding psychologists' duty to warn in cases involving testtakers who are HIV-positive,
- A. most states have enacted legislation to protect mental health professionals from liability for "good faith" disclosure to an at-risk third party.
 - B. the issue has yet to be addressed by any courts or legislature.
 - C.** most states have enacted legislation that provides limits to confidentiality of one's HIV-positive diagnosis.
 - D. the issue was historically first addressed by the Idaho State Legislature.

Accessibility: Keyboard Navigation

69. The matter of having test findings held confidential by psychologists is
- A. a matter of professional ethics.
 - B. a right upheld by case law.
 - C. a right cited in legislation.
 - D.** All of these

Accessibility: Keyboard Navigation

70. Which is TRUE of Oregon's Death with Dignity Act?

- A. Relatives of the patient must arrange a consultation with an Oregon-licensed psychologist or psychiatrist who must be available to consult with the family for a one-year period subsequent to the patient's demise.
- B. The patient must have less than a year to live to be covered by this Act.
- C.** A psychologist or psychiatrist may be requested to evaluate the patient for impaired judgment and the presence of psychopathology.
- D. All of these

Accessibility: Keyboard Navigation

71. A psychologist licensed in Oregon may not accept a referral to evaluate a dying patient under the provisions of Oregon's Death with Dignity Act

- A.** in accordance with an ethical obligation to prevent suicide.
- B. if that psychologist had previously treated the dying patient for any psychosis.
- C. if the dying patient is a member of the psychologist's family.
- D. All of these

Accessibility: Keyboard Navigation

72. In the psychological assessment of a dying patient in Oregon who is requesting "death with dignity" assistance, the role of the assessor is to evaluate the dying patient's

- A. family support system.
- B. competency to make a life-ending decision.
- C. level and sensitivity to pain.
- D.** All of these

Accessibility: Keyboard Navigation

73. For over 3,000 years, open and competitive examinations were administered in China. What these examinations measured could BEST be described as

- A. honesty.
- B. integrity.
- C. perseverance.
- D.** proficiency.

Accessibility: Keyboard Navigation

74. Which behavioral scientist viewed individual differences as a source of error in experimentation?

- A. Cattell
- B. Darwin
- C.** Wundt
- D. Witmer

Accessibility: Keyboard Navigation

75. Who coined the term "mental test"?

- A. Alfred Binet
- B.** James Cattell
- C. Victor Henri
- D. Charles Spearman

Accessibility: Keyboard Navigation

76. During World War I, Robert Woodsworth and his committee developed a measure of

- A. intelligence.
- B.** emotional stability.
- C. conscientious objection.
- D. patriotism.

Accessibility: Keyboard Navigation

77. An intelligence test originally written in English is to be administered to a group of Japanese immigrants who do not speak English. In order to obtain an accurate measure of intelligence and attempt to eliminate any possible effects due to language, the test administrator should

- A. have a professional translator read the test to the group, simultaneously translating the items word-for-word.
- B. have a friend or family member of the group who is fluent in English and Japanese read the test to the group, simultaneously translating the items word-for-word.
- C. have a teacher fluent in Japanese and English conduct a brief tutorial in English prior to administering the test in English, with specific attention given to the meaning of the wording of key items and corresponding responses.
- D.** None of these

Accessibility: Keyboard Navigation

78. Which of the following is the term used for a variant of a language that has its own rules of structure, meaning, and pronunciation?

- A. parallel language
- B. alternate language
- C.** spoken dialect
- D. regional accent

Accessibility: Keyboard Navigation

79. According to your textbook, nonverbal communication or "body language" does not

- A. exist in all cultures.
- B. impact the perceptions of others.
- C.** convey the same meaning across cultures.
- D. accurately predict which way a poor driver will turn.

Accessibility: Keyboard Navigation

80. Sigmund Freud believed that nonverbal behaviors provide clues regarding
- A. intelligence.
 - B. achievement.
 - C. ethnicity.
 - D.** motivation.

Accessibility: Keyboard Navigation

81. Which organization published *Technical Recommendations for Psychological and Diagnostic Tests*?
- A.** the American Psychological Association
 - B. the American Educational Research Association
 - C. the National Council on Measurement in Education
 - D. the Council for Exceptional Children

Accessibility: Keyboard Navigation

82. Consistent with recommendations regarding professional ethics, post-test feedback to testtakers
- A. must avoid any information that may arouse anxiety.
 - B. should focus on only "positive" findings.
 - C.** should be accurate and understandable.
 - D. will always use diagnostic labels sparingly.

Accessibility: Keyboard Navigation

83. As mentioned in your text, which of the following is a means of safeguarding test records?
- A. storing records at an external storage facility away from the office
 - B. only allowing security officials to have computer passwords
 - C. installing and maintaining a special alarm system in the record storage room
 - D.** storing test records in a locked filing cabinet

Accessibility: Keyboard Navigation

84. One of the consequences of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) is that

- A. it enabled clients to sue mental health professionals for over-charging.
- B. psychotherapy notes require more stringent protection than other types of records.**
- C. mental health professionals may not bill for completing insurance paperwork.
- D. service providers must provide confidential information to health insurance companies.

Accessibility: Keyboard Navigation

85. The fact that employment testing materials and procedures must be essential to the job and not discriminate against persons with disabilities is attributable to which legislation?

- A. Americans with Disabilities Act of 1990
- B. Civil Rights Act of 1964
- C. Family Education Rights and Privacy Act of 1974
- D. Education for All Handicapped Children Act of 1975**

Accessibility: Keyboard Navigation

86. Which legislation provided that all children with suspected mental or physical disabilities must be evaluated periodically by a team of professionals?

- A. Americans with Disabilities Act of 1990
- B. Civil Rights Act of 1964
- C. Family Education Rights and Privacy Act of 1974
- D. Education for All Handicapped Children Act of 1975**

Accessibility: Keyboard Navigation

87. Which legislation provided that parents and eligible students be given access to school records?

- A. Americans with Disabilities Act of 1990
- B. Civil Rights Act of 1964
- C. Family Education Rights and Privacy Act of 1974**
- D. Education for All Handicapped Children Act of 1975

Accessibility: Keyboard Navigation

88. Which legislation provided that employers, when making employment decisions with ability tests, cannot use different cutoff scores on the basis of race, religion, sex, or national origin?

- A. Americans with Disabilities Act of 1990
- B.** Civil Rights Act of 1964
- C. Family Education Rights and Privacy Act of 1974
- D. Education for All Handicapped Children Act of 1975

Accessibility: Keyboard Navigation

89. Which legislation modified privacy standards thus restricting the way that mental health providers can use patients' personal information?

- A. Americans with Disabilities Act of 1990
- B. Individuals with Disabilities Education Act of 1997
- C. Family Education Rights and Privacy Act of 1974
- D.** Health Insurance Portability and Accountability Act of 1996

Accessibility: Keyboard Navigation

90. Ability tests developed using samples of White testtakers cannot be used to track African-American students in the school system. This was the essence of the ruling in which of the following court cases?

- A. *Griggs v. Duke Power Company* (1971)
- B. *Larry P. v. Riles* (1979)
- C. *Debra P. v. Turlington* (1981)
- D.** *Hobson v. Hanson* (1967)

Accessibility: Keyboard Navigation

91. Which court case resulted in the ruling that intelligence tests could not be used to place African-American children in special classes in California?

- A. *Hobson v. Hanson* (1967)
- B. *Larry P. v. Riles* (1979)**
- C. *Debra P. v. Turlington* (1981)
- D. *Griggs v. Duke Power Company* (1971)

Accessibility: Keyboard Navigation

92. A general ability test predicted job performance but was found to be discriminatory because Whites scored better on it on average than African-Americans. This is a reference to which of the following court cases?

- A. *Adarand Constructors, Inc. v. Peña et al.* (1995)
- B. *Jaffee v. Redmond* (1996)
- C. *Griggs v. Duke Power Company* (1971)
- D. *Albemarle Paper Company v. Moody* (1976)**
