* Answers will vary

Medium- Three Perspectives on Social Order Questions 55, 56, 57 are based on the text below

Ellen, Tim, and Marisa volunteer at The Kitchen, a food pantry that serves poor. One afternoon, they find themselves discussing poverty. "I don't think that we'll ever completely eliminate poverty," says Ellen. "There are poor people in every society," she continues. "That leads me to think that poverty must be serving some kind of purpose. Maybe it somehow benefits society as a whole."

Tim shakes his head. "I disagree," he says. "The structure of our economy benefits some people and places others at a disadvantage." Tim continues to make his case: "For example, women are far more likely to be poor. Generally speaking, the jobs women hold pay less than the jobs men hold."

Marisa, who has been listening quietly, interjects. "You both have good points," she says. "But I come at the issue from another angle. Think about the language we use to talk about the different kinds of work people do." She pauses for effect. "What do we call the people who collect trash? Garbage men. That's degrading." Seeing she has their attention, Marisa gives another example: "When someone cleans houses or is a fast food cook, we say they do 'menial' work. Surely the way we talk about different kinds of work has an effect on how much people are compensated for doing it."

Medium- The Structural-functionalist Perspective

55. Ellen's thoughts about poverty are most consistent with this theoretical orientation:

- a. conflict
- *b. structural-functionalist
- c. symbolic interactionist
- d. feminist
